M. Wada (m-wada@nagasaki-u.ac.jp)	Analytical Research for Pharmacoinformatics (Analytical Chemistry in Health and Environmental Sciences)
K. Nishida and S. Fumoto (koyo-n@nagasaki-u.ac.jp)	Pharmaceutics (Pharmacokinetics in Health and Environmental Sciences)

MAJOR TEACHING AND RESEARCH FIELDS

Graduate School of Biomedical Sciences (Master Course)

Department of Molecular Medicinal Sciences

Division of Pharmaceutical Chemistry

Research Fields:

- Design and synthesis of non-proteinogenic amino acids and their utilizations
- Studies on bio-inspired molecules

Division of Cell Regulation

Research Fields:

- Physiological role of the ERK-MAP kinase signaling pathway in the regulation of diverse cellular processes
- Development of new chemotherapeutic strategies against cancer via specific blockade of the ERK-MAP kinase pathway or the PI3 kinase/Akt pathway

Division of Molecular Pharmacology and Neuroscience

Research Fields:

- Molecular and cellular biology of neuronal protection
- Molecular, cellular and behavioral sciences of opioids and their receptors
- Molecular and behavioral sciences of pain
- Molecular and cellular biology of neurosteroids and endocrine disruptors

Division of Pharmaceutical Organic Chemistry

Research Fields:

- Development of a new methodology for the construction of complex molecules
- Development of a new synthetic reagent and reaction
- Synthesis of biologically active compounds
- Chemical biology based on natural products

Division of Synthetic Chemistry for Pharmaceuticals

Research Fields:

- New synthetic methods using optically active α -amino acids
- Synthesis of drugs utilizing electrochemical oxidation
- Asymmetric synthesis using new chiral ligands
- Recognition of polyols

Division of Molecular Biology & Biotechnology

Research Fields:

- Analysis of Alzheimer's disease pathogenesis and development of new therapeutic methods, e.g. gene therapy etc.
- Application of induced pluripotent stem (iPS) cell technology to Alzheimer's disease research
- Gene therapy for neurodegenerative diseases
- X-ray crystallographic analysis of enzymes toward design of specific enzyme inhibitors
- Application of genetically modified-microbial enzymes for diagnostic tools

Division of Molecular Pharmacology of Infectious Agents

Research Fields:

- Virus infections and apoptosis
- Development of anti-virus drugs
- Development of an AIDS vaccine using influenza virus as a vector
- Screening of a new toxin-producing marine microorganism

- Analysis of signal transduction mechanisms involving cytokines in various types of diseases

Department of Medicinal Natural Product Chemistry

Division of Natural Product Chemistry

Research Fields:

- Studies on the toxic constituents from Chinese and Japanese Illicium plants
- Chemical investigation on the constituents from Chinese and Malaysian medicinal plants
- Studies on structure and function of polyphenols
- Studies on oxidation mechanism of catechins and related polyphenols

Division of Medical Plants Biochemistry

Research Fields:

- Studies on marine natural product chemistry

Division of Instrumental Analysis for Molecular Structure

Research Fields:

- Design and synthesis of molecular probe for drug discovery

Department of Pharmaceutical Health Sciences

Division of Chemistry of Biofunctional Molecules

Research Fields:

- Molecular recognition of peptides and their new sequence analysis
- Super-sensitive optical detection of nucleic acids and proteins
- Studies on transcription factors and cell regulation
- Development of novel functional nucleic acids

Division of Hygienic Chemistry

Research Fields:

- An assessment of Niboshi (a processed Japanese anchovy) as an effective food source of selenium
- Selenium metabolic pathways in biological systems
- Blood glucose-lowering efficacy of vanadium (IV, V)-hydroxamate complexes in diabetic mellitus
- *In vivo* A β -aggregate imaging agents for early diagnosis of Alzheimer's disease
- Development of a generator system for PET imaging agents not using cyclotron facility

Division of Analytical Chemistry

Research Fields:

- Development of luminescence reagents for biomedical analyses
- Development of functional packing materials for HPLC and CEC separation
- Development of analytical method for environmental pollutants
- Study on novel chemiluminescence reactions for analytical chemistry

Department of Clinical Pharmacy

Division of Pharmacotherapeutics

Research Fields:

- Identification of the susceptibility genes for diseases

- Identification of the responsibility genes for drugs , adverse effects, and prognosis
- Establishment of DNA-based diagnosis for personalized medicine
- Elucidation of molecular mechanisms of resistance to anticancer drugs

Division of Analytical Research for Pharmacoinformatics

Research Fields:

- Analytical research for rational use of medicaments
- Study on clinical analysis of drugs of abuse
- Clinical pharmaceutical studies on drug-drug interaction
- Clinical pharmaceutical studies on functional foods

Division of Pharmaceutics

Research Fields:

- Organ- and site-selective delivery of drugs following the organ surface application
- Organ- and site-selective gene transfection following the application of naked plasmid DNA to the organ surface
- Changes in pharmacokinetics of drugs during hypothermia

APPLICATION FORM FOR NUPGP

INSTRUCTION (記入上の注意)

1. Application should be typewritten or written in Roman block capitals.
(記入は楷書又はローマ字体を用いること。)
2. Numbers should be in Arabic figures.
(数字は算用数字を用いること。)
3. Year should be written in the Anno Domini system.
(年号はすべて西暦とすること。)
4. Proper nouns should be written in full, and not be abbreviated.
(固有名詞はすべて正式な名称とし、一切省略しないこと。)
5. Examination fee of 30,000 Yen should be enclosed, if application is for the private-expense student.
(私費で出願する場合は、検定料30,000円を添えること。)
6. Enter the address below for notifying the result of the selection.
(合格通知書等の送付先を下記欄に記入のこと。)

*Personal data entered in this application will only be used for scholarship selection purposes, and contact information such as e-mail addresses will only be used for forming related human networks after the student returns home and for sending of information by the Japanese Government.)
