

## Molecular Pharmacology

### Research paper list since 2011

- A English paper
  - A-a Original article
  - A-b Review
  - A-c Book
  - A-d Others

## 2011

### A-a

1. Kakiuchi Y, Nagai J, Gotoh M, Hotta H, Murofushi H, Ogawa T, Ueda H, Murakami-Murofushi K: Antinociceptive effect of cyclic phosphatidic acid and its derivative on animal models of acute and chronic pain. *Mol Pain*.7:33, 2011 (IF 4.148)
2. Nagai J and Ueda H: Preemptive morphine treatment abolishes nerve injury-induced lysophospholipid synthesis in mass spectrometrical analysis. *J Neurochem*. 118(2):256-65, 2011 (IF 4.337)
3. Nishiyori M, Uchida H, Nagai J, Araki K, Mukae T, Kishioka S, Ueda H: Permanent relief from intermittent cold stress-induced fibromyalgia-like abnormal pain by repeated intrathecal administration of antidepressants. *Mol Pain*.7:69, 2011 (IF 4.148)

### A-b

1. Ueda H and Ueda M: Lysophosphatidic acid as initiator of neuropathic pain - biosynthesis and demyelination. *Clin Lipidol* 6(2):147-158, 2011 (IF: 0.556)
2. Ueda H: Lysophosphatidic acid as the initiator of neuropathic pain. *Biol Pharm Bull*. 34(8):1154-1158, 2011 (IF: 1.811)
